
Analyze and report on your manufacturing operations in minutes, without the painful setup required from third-party BI tools.

AVOID EXPENSIVE ANALYSIS—

SAVE COUNTLESS HOURS FROM MANUAL WORK AND THIRD-PARTY BI TOOLS:

Most manufacturers don't realize they're wasting time and money from inefficient data analysis. They have to export their data, manually format thousands of rows and metrics, and then use Excel and other third-party tools to generate and email reports, all of which require countless lost hours every month, along with the built-in software license fees. And this lack of standardized reporting introduces manual biases with every knowledge transfer, multiplying the risk for error.

With Shoplogix Manufacturing Analytics Software...

You get all the capabilities that third-party analytics tools offer, including interactive dashboards and email scheduling, except everything is already configured and connected to your machines. All your machine and OEE data is always available in one single place and is automatically refreshed on out-of-the-box analytics dashboards. No additional formatting or data manipulation required! You consolidate your entire data analysis workflow across your organization. You only need to log in to one single software for your entire production monitoring, measuring, and reporting needs.

UNCOVER HIDDEN PRODUCTION ISSUES WITH PINPOINT ACCURACY: EMPOWER YOUR PRODUCTION, CI, QUALITY, MAINTENANCE, AND EXECUTIVE TEAMS TO MAKE DATA-DRIVEN DECISIONS:

You may have teams dedicated to analyzing and optimizing OEE and throughput. However, you're only catching issues that are easily visible to your production teams or obvious in your quality/CI data. This gives you a false sense that you're focusing your efforts on the correct problems, while undetected issues may be recurring every day in front of you, quietly eating away at your margins.

With Shoplogix Manufacturing Analytics Software...

No more guesswork. You can find the true problem offenders by slicing your data in as many ways as you can imagine, with little to no learning curve. Everything in the portal is easily labeled for you to choose. Just pick your metrics, and we do the rest. You can prioritize your continuous improvement efforts using any production data you want. For example, you can measure a specific downtime reason by machine, shift, area, machine type, work order, and countless other measures. You can trend virtually any production KPI or work order, at any granularity, so that you can monitor improvement initiatives and their true effectiveness, and identify new areas for improvement to ensure your work orders are being carried out efficiently.

REVIEW YOUR ENTIRE COMPANY'S HEALTH IN UNDER 15 MINUTES— LEARN ABOUT THE PERFORMANCE AND TRENDS OF ALL YOUR PLANTS AND REGIONS, WITHOUT HAVING A SINGLE DEPARTMENT MEETING

You put trust in your department managers to provide you with their strategic recommendations. But you don't have easy access to end-to-end data across your entire organization and product-lines. Complete oversight is virtually impossible without spending time holding meetings and cobbling together various sources of information, which is a job in itself.

With Shoplogix Manufacturing Analytics Software...

Shoplogix's out-of-the-box Executive Dashboard gives you a complete, holistic view of your entire manufacturing operations. No setup required. You're always one click away from an organization-level interactive dashboard. Start with high-level KPIs and then drill down to see how your operations at different geographic locations are performing. You'll always have a pulse on what is happening, everywhere, and you'll always be equipped with the right information to make profitable strategic decisions.

CAPABILITY	THIRD PARTY ANALYTICS TOOLS	SHOPLOGIX MANUFACTURING ANALYTICS SOFTWARE
Ability to design interactive dashboards	✓	✓ We've had customers describe our analytics platform as "just like Power BI, except all the work is done for me"
Clean (formatted) data	X Data has to be manipulated and cleaned before it is imported; requires an analyst.	✓
Ability to email and share dashboards out of the box, without additional licenses or fees	X Additional fees for every user, and additional fees for publishing shareable dashboards.	✓
Set-up time and configuration	X Considerable set-up time required to import data, format data, and build dashboards.	✓ No set up time. Out-of-the-box solution.
Pre-built production dashboard	X	✓
Pre-built executive dashboard	X	✓
Pre-built continuous improvement dashboard	X	✓
Pre-built quality dashboard	X	✓
Pre-built maintenance dashboard	X	✓
Pre-built job variance dashboard	X	✓

About Shoplogix

Shoplogix is re-defining the manufacturing industry by making the Smart Factory platform the cornerstone of digital production performance transformation. By empowering manufacturers to visualize, integrate, and act on production performance in real-time, Shoplogix helps to uncover hidden shop floor potential and drive rapid time to value.
